

## **NicheReaper Review**

Doing Keyword research is the first and most important stage of building any successful Niche site, get it wrong and all your time, money and efforts will be wasted!

The problem is it's a pretty tedious, long winded and boring job!

So having a system that fully automates the process, delivering hundreds of new valuable, easy to rank for niches, complete with all the best keywords to target in that niche would be pretty awesome, wouldn't it..?

Enter NicheReaper!

NicheReaper is a brand new, fully automated keyword based niche market research system that finds and gives you the best keywords to target in hundreds of new niches every single day!

You can see a full insider demo video review of NicheReaper at <http://topkeywordlists.com/nichereaper-review/>

This fully automated keyword and niche research system researched over 20,000 new potential keywords every single day, day after day.

It then checks each keyword to see what "opportunities" there are to achieve a high ranking in the Google search engine results pages.

Most keyword research courses tell you to look at the number of competing sites, but this is actually irrelevant, as you're only going to get any visitors if you're on the first page of google, and in fact the majority of the click go to those sites in the top 5 results, so that's where you should be looking. NicheReaper does this for you.

The system identifies potential "weak" results in the top 5 that can be targeted and outranked using simple search engine optimization and backlinking tactics.

Once the system has identified potential keywords that you CAN rank for, it then goes on to evaluate the real "value" of that keyword to make sure it is actually worth going after, in other words whether you are likely to make money once you do rank for the keyword.

The system then goes a step further... It groups related keywords (including LSi keywords) together in to complete "Niches", giving you all the information you need to target a niche market as a whole and create a true authority site, gaining even more free targeted traffic from the search engine results.

This is a revolutionary system and will ensure it's members never have to do boring, long winded keyword research again!

There are going to be limited places available, and the price goes UP on Friday 20<sup>th</sup> May, so I'd recommend checking out the full demo review video of NicheReaper right now: -
